Professional Summary

Enthusiastic Software Developer with a strong foundation in **Java, HTML, CSS, JavaScript, React.js, JDBC, SQL, PostgreSQL, and REST API development**. Hands-on experience in developing responsive web applications and integrating **Generative AI APIs** to build intelligent user-centric solutions. Strong understanding of object-oriented programming, database management, frontend development, and software engineering principles. Passionate about learning modern technologies and delivering clean, efficient, and maintainable software solutions.

Technical Skills

Programming Languages: Java, JavaScript

Core Java: Object-Oriented Programming (OOP), Exception Handling, Collections Framework, JDBC

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js

Database: PostgreSQL, MongoDB, SQL

Backend: REST APIs, JDBC

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Postman

Soft Skills: Problem Solving, Team Collaboration, Communication, Leadership, Quick Learning

Projects

AI-Based Trip Planner | *React.js, Java, MongoDB, REST APIs, Google Gemini API* 🐙 GitHub

- Developed a full-stack AI-based Trip Planner consisting of **15+ reusable React components** for itinerary generation and trip management.
- Integrated **Google Gemini API** and REST APIs to generate **personalized day-wise travel itineraries** based on destination, budget, duration, and user preferences.
- Designed responsive user interfaces with **100% mobile-friendly layouts** using React.js, HTML5, CSS3, and JavaScript.
- Implemented backend business logic using Java and managed trip data with **MongoDB**, supporting CRUD operations and efficient data storage.
- Reduced manual trip planning effort by automatically generating complete itineraries within **3–5 seconds** based on user inputs.

Employee Management System | *Java, JDBC, PostgreSQL, OOP*

- Developed a menu-driven Employee Management System to manage employee records using Java and JDBC.
- Implemented CRUD operations (Create, Read, Update, Delete, and Search) with PostgreSQL database integration.
- Applied Object-Oriented Programming concepts including Encapsulation, Inheritance, Polymorphism, and Exception Handling.
- Used JDBC for database connectivity and executed SQL queries for efficient employee data management.

Education

SVERI's College Of Engineering

BTech in Electronics and Telecommunication; SGPA: 8.69/10

Nov. 2022 – June 2026

Pandharpur, Maharashtra

Internship

QSpiders/JSpiders

Dec. 2025 – July 2026

Java Full Stack Training

- Gained hands-on experience in **Core Java, SQL, HTML, CSS, JavaScript, React.js**, and modern web application development.
- Developed mini applications using **Java** and **React.js**, strengthening problem-solving and debugging abilities.
- Worked with **JDBC, Collections Framework, Exception Handling, OOP Concepts**, and database connectivity for application development.

Certifications

- Java Programming
- Artificial Intelligence - Infosys Springboard

Extracurricular Activities

- Participated in hackathons and coding events to improve problem-solving and teamwork skills.
- Attended technical workshops on Java, Web Development, and Artificial Intelligence to enhance practical knowledge.
- Regularly practise coding and build personal projects to strengthen programming skills.
